

International Summer School June 2017

Forest Planning and Management

New Tools and Techniques

First registration deadline **15th March 2017**

Registration fees will increase by 50 Euros after this date. Places are limited.

19-23 June
Waterford
Institute of
Technology
Ireland

Providing the very latest information and training to help make informed forestry management decisions at the tree, stand and property level.

Including field work training with the latest field tools and techniques for assessing tree size and form, timber quality, stand quality and site suitability, and systems for mapping stands and forest properties over large areas using drones, aircraft and satellites.

For professional foresters, forest consultants, managers and owners, forestry policy makers, and postgraduate-level students.

The **Society of Irish Foresters** will provide sponsorship to two early-career forest professionals attending the course. These will be chosen by the committee following registration.
